Varun Sandesh Uppu | VarunUppu | VarunUppu | Varun Uppu | Karimnagar, Telangana – 505001, India

Objective

- Motivated Computer Science student with strong programming and problem-solving skills, passionate about building impactful software solutions.

Academic Qualifications

- **Kommuri Pratap Reddy Institute of Technology** — *Sept 2023 – May 2027*
  Computer Science and Engineering (Undergrad) — Hyderabad, India
- **Trinity Junior College** — *June 2021 – March 2023*
  MPC — Karimnagar, India
- **Siddhartha High School** — *July 2020 – May 2021*
  SSC E/M — Karimnagar, India

Skills

- **Languages:** Python, JavaScript, HTML, CSS, C
- **Frameworks & Stack:** MERN (MongoDB, Express.js, React.js, Node.js), REST APIs, Flask
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, Microsoft Office, Canva
- **Soft Skills:** Problem Solving, Teamwork, Leadership, Adaptability, Active Listening, Critical Thinking

Projects

- **Confidential Governament Order (GO) Storage System** — *May 2026 – June 2026*
  Tools: Python, Flask, TinyDB, HTML5, CSS3, Vanilla JavaScript *GitHub*
  - Secure multi-role Flask web app with AES-256 file encryption, role-based access control across three admin tiers, and Cloudflare Turnstile bot protection.
  - Dynamic dashboards with live stats, real-time notifications, encrypted file sharing, and report submission workflows across Government, Collector, and Local Body roles.
  - Fully responsive custom CSS frontend with light/dark mode support across 16 Jinja2 templates.
- **Data Analytical Tool for HR** — *Sep 2023 – Oct 2023*
  Tools: Python *GitHub*
  - Developed a Python-based tool to automate the analysis of employee data for HR processes.
  - Implemented algorithms to ensure precise data processing, enabling HR teams to make informed decisions.
  - Improved HR analytics efficiency by 30% by automating data workflows and reducing manual effort.

Internship

- **Software Development Intern – The Art of Living** — *Jul 2025 – Aug 2025*
  Tools: MERN Stack
  - Developed a full-stack Asset Registry module using the MERN stack (TypeScript), implementing complete CRUD functionality, a responsive modal-driven React UI, and optimized backend APIs for efficient asset management.
  - Improved application performance and reliability by implementing MongoDB Aggregation Pipelines to reduce API payloads and accelerate UI load times, while resolving a critical asynchronous race condition through promise-based client-side logic that ensured data integrity and eliminated false error reporting.

Certifications

- **Introduction to C (Sept 2023)**
- **Introduction to Python (April 2024)**
- **Python Certification from Kaggle (May 2024)**
- **Introduction to Java (Aug 2024)**

Accomplishments

- Presented a seminar on **Large Language Models** at Aarohan - 2K24, held at Kommuri Pratap Reddy Institute of Technology.
